

# Don't be wishy-washy.

Save energy when using the dishwasher.

- **Load it up:** Only run with a full load of dishes.
- **Dry with air:** Deselect "dry-cycle" and prop open the door to air dry.
- **Go eco-friendly:** Select the "eco" setting (when available)

By doing this you will save enough energy to brew **156** pots of coffee per year! For more ways to save energy visit: [sustain.ok.ubc.ca](http://sustain.ok.ubc.ca)
