

The Hanger Gym Expansion, UBC Okanagan Campus

## Credit Guidance

## Integrative Processes

**IP Credit:**  
**Integrative Processes**

CAMPUS	MANDATORY	PRIORITY	AVAILABLE
Vancouver	1		1
Okanagan	1		

**REQUIREMENTS**

All projects must comply as per LEED BD+C v4.1.

**RESOURCES**

[Appendix A - UBC Integrated Sustainability Process](#)

**GUIDANCE**

Project teams should reference the UBC Integrated Sustainability Process (Appendix A) for alignment with the credit requirements. UBC considers an integrative process vital to a holistic, systems-based approach to sustainable design and construction. Early analysis of interrelationships among systems can support efficient, simplified, and cost-effective strategies for high performance outcomes.

Project teams may choose to analyze any available issue area but must still comply with the established UBC Integrated Sustainability Process which requires energy- and water-related systems to be assessed early in the project and documented in alignment with the requirements of this credit.

The UBC Integrated Sustainability Process in Appendix A shows alignment with the project milestones and the requirements of the Integrative Process credit. Projects are required to submit a draft Project Team Letter following Sustainability Workshop 1.

Centre for Interactive Research on Sustainability – Living Wall Lecture Hall, UBC Vancouver Campus
