CAMPUS COMMUTER CHALLENGE

COMMUTER CHALLENGE

September 23 to October 4

Bike | Bus | Carpool | Roll | Walk

Did you know the average single commuter emits 3.6 tonnes of carbon dioxide (tCO₂e) per year? This is equivalent to consuming 1,538 litres of gasoline or using enough electricity to power 2.4 homes for a year. Join the 2019 *Campus Commuter Challenge* to reduce emissions and become a **green** commuter!

Register to participate in the **Campus Commuter Challenge** today and log your commuter trips between **September 23 to October 4, 2019** to capture your efforts and to be eligible for prizes.

Participating is as simple as using an alternative method to commute to campus versus using a single-occupancy mode.

Choose to:

- carpool with one or more coworkers or classmates;
- roll to campus on a bike, blades or chair;
- take a scenic ride on the bus while reading the news; or
- get the day started with a brisk walk.

Already a 'green' commuter? Register and track your ongoing commitment to supporting a cleaner future and become eligible to win great prizes!

Read about the [events schedule, prizes and commuting facts](#).

2019 RESULTS

How did you commute to campus today?

I Ran

I Carpooled

I Biked

I took the Bus

I took the Bus & Rode my Bike

I Walked
